

# Close My eyes

*I saw her face hiding in the crowd, whispering my name as she reach out for my heart*

*But her whispers fades away like echoes in my head, I close my eyes and dream away, and hope that I'll be found*

*I saw her face hiding in the crowd, I turned around, I called her name, but she's already gone*

*Bridge:*

*Then she appears again and rescuing my soul*

*Chorus:*

*I see her face, I see her smile, every time I close my eyes  
I need the air, that she breath, I need her here beside of me  
She's so close and she's so near, but yet still so far away  
I see her face, I see her smile, every time I close my eyes*

*I hope someday, she will take my hand, take me away as far as she can  
Take me as I am*

*Bridge:*

*She will save my soul and give me inner piece*

*Chorus:*

*Musical bridge:*

*I see her face, I see her smile, all the time  
I see her face, I see her smile, every time*

*Chorus:*
